

# Wireless Delivered

## REAL TIME MOBILE DATA SOLUTIONS

In today's business environment, when time really is money and fast, accurate information is key, managing a mobile workforce has its own specific difficulties. Not least is the need to schedule jobs efficiently and maintain high accuracy levels for delivery data.

WirelessDelivered from Wire<sup>3</sup> provides a complete job allocation and signature capture solution. With a wide and expanding range of standard solutions, plus the ability to design the application to your specification, WirelessDelivered (WD) is ideal for almost any mobile workforce including;

- Same day & overnight delivery services
- Waste management
- Patient transport
- Airport services
- Meals on wheels
- Haulage and distribution
- Service companies
- Aggregates and construction

Transferring data reliably in real-time between control centres and mobile workers via GPRS and 3G, WD solutions integrate into any back office system and are project managed and deployed for an affordable fixed monthly cost, offering you:

### Operational Efficiencies

- Less paperwork & time savings
- Reduced manual data entry
- Real time resource planning & scheduling of jobs

### Improved Customer Service

- Better status information
- Real time POD & signature capture
- Fast, efficient services

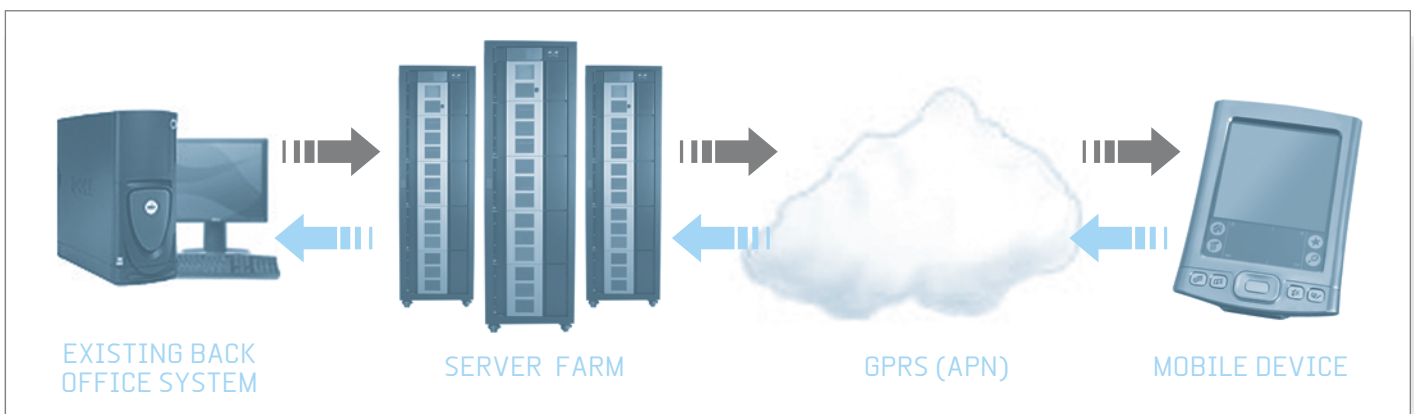

### Reduced Costs

- Less phone communication
- Improved personnel/vehicle utilisation
- Immediate invoicing

### Low Financial Exposure

- No capital expenditure or development costs
- Transparent, fixed monthly payments
- No hidden extras

And why not combine WirelessDelivered with our Sat<sup>3</sup> Vehicle Tracking and TomTom SatNav systems for a complete vehicle and delivery services management solution.
